DETAILED ACTION

Specification

1. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the term "ATV-type tire" should be described in the specification. Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
3. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The terms "ATV-type tire" is unclear; the examiner notes the applicant fails to provide a description in the specification of the terms.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2, 4-10, 15-18, 24-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Matsuura (6,622,806).

Matsuura teaches an ATV comprising a frame 12; at least three wheels suspended from the frame, two of which are front wheels and two which are rear wheels, the front wheels defining a front axis and the rear wheels defining a rear axis; a power unit for driving at least one of the wheels disposed on the frame; a straddle-type seat supported including a main seat portion and a secondary seat portion, rearward of the main portion; right and left footrests including a front footrest 50, 54 and a rear footrest 50; and a steering member comprising handlebars. With respect to the wheelbase, it would have been an obvious matter of design choice to have the wheelbase a specific size and/or a size within a specific range, since such a modification would have involved a mere change in the size of a component. A change in size is generally recognized as being within the level of ordinary skill in the art, as well as, discovering the optimum or workable ranges involves only routine skill in the art. The front footrest 54 and the rear footrest 50 of each of the right and left footrests are separate. The front footrest 50 and the rear footrest 50 of each of the right and left footrests are integral. Regarding claims 6-9, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have a longitudinal length of each of the right and of the left footrests be within a specific distance, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. As shown in figure 2, Matsuura teaches a heel stop. The front and rear footrests each include upper surfaces that are substantially horizontal. One of the front and rear

footrests is angled with respect to horizontal, for each of the right and left footrests, respectively. Regarding claims 24, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have a specific ratio of the wheelbase to a longitudinal length of the footrest, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art.

Allowable Subject Matter

6. Claims 3, 11-14, 19-23 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Faye Fleming whose telephone number is (703) 305-0209. The examiner can normally be reached on M-F (9:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on (703) 308-2089. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
